

SOCIAL & VOLUNTEER WORK

1989: Volunteer, Ufa railway catastrophe, supported physical and psychological rehabilitation of Ufa Burn Clinic children (ages 2-18). Movement based reflex approach used to reach and move children beyond trauma (based on Vygotsky's Learning Theory, Sechenov's Reflex Theory of the Brain, Dennison's movement activities (Brain Gym) and other movement & tactile activities as work with children advanced. Program innovation led to emotional rehabilitation and physical recovery six to eight times faster than known current methods and techniques. Published articles and book present work results. Awards extended and tributes made by Ufa and Moscow Universities in honour of outstanding results in work.
